96% tobacco reclaim

smart.  
silent.  
outstanding.

**DWR+**

EFFICIENCY - MADE BY DECOUFLÉ

## DWR+ direct tobacco recovery: cash back on your waste

Using a vibrating sieve, the tobacco is separated from the paper and filters and returned directly to the hopper on the maker where it is mixed together with the new tobacco.

With the new DWR+ you can process up to 96% of tobacco from ejected cigarettes immediately in your cigarette maker. DWR+ can be used for all cigarettes, cigars and cigarillos as both an online and as a standalone system. It can be retrofitted to all cigarette makers with a speed of up to 16,000 cpm – including other machines on the market. The system collects the waste at the maker, separates the tobacco from the paper and filter, and conveys the tobacco back into the maker. DWR+ therefore pays for itself in next to no time.

### Minimized tobacco degradation

With the DWR+, different blends, added menthol or expanded tobacco stay in the machine and are recovered immediately. No time is wasted handling rejects, the tobacco doesn't dry out and is processed gently.

### Fully automatic, space saving

The fully automatic DWR+ system can be installed behind the maker to save space. It is easy to operate and doesn't require a lot of maintenance: cleaning is simple and all wearing parts are easily accessible.

Reduce your production costs effortlessly with DWR+ and enjoy a short payback time:

- Reduced noise and vibrations
- Less dust
- Improved sieving results (possibility to adjust vibration amplitude)
- Reduced operating costs

<b>Tobacco reclaim</b>	up to 96 %
<b>Compatible makers</b>	Makers up to a speed of 16,000 cpm
<b>Performance</b>	King Size 45 kg/h   Slim 35 kg/h   Super Slim 25 kg/h
<b>Product length</b>	Max. 300 mm
<b>Product diameter</b>	5.4 - 8.2 mm
